‘ReachOut health-tracking cohort study’, 2016-2017

‘bmi’ dataset

user.id	Unique participant ID number assigned by study platform on registration
Width:	4
Decimal:	0
Variable Type:	numeric
Variable Measure:	nominal
	Based upon 137 valid cases out of 137 total cases
source	Name of app which participant linked to the study platform and from which data has been fetched via Human API
Width:	24
Decimal:	0
Variable Type:	string
Variable Measure:	nominal
	Based upon 137 valid cases out of 137 total cases
measurement_date_time	The time and date when activity data was fetched by the study platform from the app source via Human API (dd/mm/yyyy hr:min:sec)
Width:	63
Decimal:	0
Variable Type:	string
Variable Measure:	nominal
	Based upon 137 valid cases out of 137 total cases
value	Participant Basal Metabolic Index (BMI) in kg/m2
Width:	2
Decimal:	0
Variable Type:	numeric
Variable Measure:	scale
	Based upon 137 valid cases out of 137 total cases
	<ul style="list-style-type: none">• Mean: 33.8• Median: 40.0• Mode: 43.0

- Standard Deviation: 10.14
