

## **‘ReachOut health-tracking cohort study’, 2016-2017**

### **‘body\_fat’ dataset**

<b>user.id</b>	<b>Unique participant ID number assigned by study platform on registration</b>
Width:	4
Decimal:	0
Variable Type:	numeric
Variable Measure:	nominal
	Based upon 79 valid cases out of 79 total cases
<b>source</b>	<b>Name of app which participant linked to the study platform and from which data has been fetched via Human API</b>
Width:	18
Decimal:	0
Variable Type:	string
Variable Measure:	nominal
	Based upon 79 valid cases out of 79 total cases
<b>measurement_date_time</b>	<b>The time and date when activity data was fetched by the study platform from the app source via Human API (dd/mm/yyyy hr:min:sec)</b>
Width:	63
Decimal:	0
Variable Type:	string
Variable Measure:	nominal
	Based upon 79 valid cases out of 79 total cases
<b>value</b>	<b>Participant Body Fat reading in percent</b>
Width:	2
Decimal:	0
Variable Type:	numeric
Variable Measure:	scale
	Based upon 79 valid cases out of 79 total cases
	<ul style="list-style-type: none"><li>• Mean: 41.2</li><li>• Median: 48.0</li></ul>

- Mode: 48.0
- Standard Deviation: 11.75
